Upcoming Pathways Planning Information Evenings will allow parents and students to explore all of the opportunities that high schools have to offer in the Halton District School Board

Does your child want to explore or try out a career path in high school before heading to apprenticeship, college, university or the workplace? Does he need help to re-focus and increase engagement in high school and graduation? Does she have a passion for hands-on learning outside the classroom with a greater relevance to the subjects being taught in school?

The Halton District School Board is changing to better meet individual needs helping more students succeed at a high level in pursuing their chosen pathway.

Come out and get more information on how your child can better prepare themselves for a rapidly changing world, at the same time as receiving a relevant, engaging and active education that meets individual interests and needs of students. Find out more information about the new and innovative programs that have been developed by the Ministry of Education and that are now being implemented by the Halton District School Board and how to plan for them in their senior years of high school.

These programs include the new Specialist High Skills Major programs, Ontario Youth Apprenticeship Programs, Specialty School to Career programs, expanded Cooperative Education programs, Dual Credit college programs and more.

We feel that it is very important to inform our community (parents and students) on how the Halton District School Board is changing to best meet the needs of our students and prepare them for this ever changing world that we live in. We have been in the process of developing and implementing projects and programs that we believe will give students the edge they need as they prepare to exit from high school to Apprenticeship, College, Community, University or directly to the Workplace. If you have any questions, feel free to contact us for more information. Thank you,
