From individual school actions to collective impact

School ground greening projects taking place

School Story Joseph Gibbons PS

Action: Indoor Gardening and Greenhouses
 Using their grant for an indoor grow tower, students at Joseph Gibbons PS planted a variety of seeds to grow produce. Their fresh produce was shared with the school community, including to families and as healthy snacks for students. Additionally, Joseph Gibbons PS collaborated with nearby schools to share resources and tips for shared indoor gardening success and community building.
**Photos included in your report are from school applications. Media release forms from EcoSchools Canada have not been collected.*

Environmental and Global Citizenship

Board Story NEW! Environmental Leadership Learning Centre

In April, HDSB launched its new Environmental Leadership Learning Centre - a vibrant and innovative space dedicated to advancing environmental and global citizenship through collaboration, creativity and action! Located at Alexander's Public School, the centre brings together students, staff and community partners to explore real-world sustainability challenges and create meaningful change across the system.

Next Steps at HDSB

Share Your Sustainability Work Publicly

HDSB is already demonstrating strong leadership through its internal sustainability work and annual report. Building on this solid foundation, making your plans and progress publicly accessible is a natural and impactful next step.

Explore the NEW! [Creating a Climate Action Plan solution card](#) in the EcoSchools Board Program to see examples from leading boards, explore planning frameworks, and support the development of a public-facing plan or report that reflects your board's ongoing leadership.
