4 Community Profile		
1	Demographic Information	
	Demographic estimates provided in this section are based on an overlay of census tract data from the 2011 Census and National Household Survey with school English program catchment boundaries. Data is based on the entire population that resided within a school's catchment at the time of the reference period for the Census or National Household Survey, including non-school aged children, adults and seniors. The purpose of this data is to provide an overview of the community surrounding the school and do not form the basis of the Board's enrolment projections for schools.

2	Number of private households	13,303
3	Average individual income	\$46,564
